I am a Software developer with a creative background in Graphic Design, using that knowledge I am able to create simple and elegant code. With my passion for design and function, I am able to create interactive code with the users experience in mind.

PROJECTS

Hangman

Event driven Guess the word game created using HTML5, CSS and JavaScript.

Book Blab

Express-Node-Mongoose application using EJS views to create a forum to review and add books.

ShortLit

Full-stack app using Python- based Django Web Framework, HTML, CSS, and AWS S3.

Save Your Smite

A Mongoose-Express-React-Node application that is based off the MOBA video game "SMITE". Save Your Smite allows a user to create and save a build that worked well for them in the game. A user also has the ability to see other users builds.
